

CARLOS CAPITÃO

Industrial Automation Technician

CARLOS18MAURO@GMAIL.COM • +244 934 527 303 / 952 932 196 • [linkedin.com/in/carlosccdomingos](https://www.linkedin.com/in/carlosccdomingos) • Talatona, Luanda

PROFILE

I have been working in industrial automation for approximately two years, during which I took on technical supervision responsibilities at EDACO. I have hands-on experience programming PLCs from the leading market brands — Siemens, Schneider and Allen Bradley — as well as in industrial networks and SCADA systems. My background in computer science allows me to approach systems in an integrated way, something that has proved valuable in the projects I have been involved in. I continue to provide consultancy to EDACO on request.

PROFESSIONAL EXPERIENCE

Technical Automation Supervisor — EDACO | 2023 – 2025

- Supervision and maintenance of automation systems in an industrial environment.
- Programming of Siemens, Schneider and Allen Bradley PLCs.
- Development and configuration of HMI interfaces for process monitoring.
- Implementation and maintenance of SCADA and DCS systems.
- Configuration of variable frequency drives (VFDs) and servo motors.
- Diagnosis and troubleshooting of industrial network faults (ProfiNet, ProfiBus, ModBus).
- Preparation and presentation of automation projects to company management.
- Ongoing technical consultancy following the end of the employment contract.

TECHNICAL SKILLS

PLCs & Control

- Siemens S7-300/400/1200/1500
- Schneider (Modicon)
- Allen Bradley (RSLogix)
- Ladder, FBD, ST, SFC
- Motion Control: VFDs & Servo Motors

Networks & Protocols

- ProfiNet / ProfiBus
- ModBus RTU / TCP
- EtherNet/IP
- I/O Link
- Signals: 4-20mA, 1-5V, 0-10V

Systems & Safety

- SCADA and DCS
- HMI (WinCC, FactoryTalk)
- Industrial Instrumentation
- Sensors and Final Elements
- HAZOP, SIS, ICSS, F&G
- Industrial Robotics

LANGUAGES

Portuguese — Native language

English — Fluent (written and spoken)

EDUCATION

Bachelor's Degree in Computer Science

Universidade Agostinho Neto — Luanda, Angola | 2014 – 2026

Unified IT Implementation Course

IPVx — Luanda, Angola | 2025

Industrial Electricity and Electrical Controls

P R O J E C T S

Water Treatment Plant (WTP) Industrial Automation System

Academic Project — EDACO / Universidade Agostinho Neto | 2025

- Development of a complete industrial automation system for a Water Treatment Plant, covering all 6 process stages: intake, coagulation, sedimentation, filtration, disinfection and distribution.
- Programming of Ladder and FBD control logic on a Siemens S7-1500 PLC via TIA Portal; automated chemical dosing, tank level control and automatic filter backwash.
- Configuration of a SCADA system in WinCC for real-time supervision, data historian, alarm management and quality reports; integration over ProfiNet and ModBus TCP networks.
- Development of HMI interface with process synoptics, manual/automatic control, alarm panels and historical charts; implementation of safety interlock systems (HAZOP/SIS).
- **Technologies:** Siemens S7-1500, TIA Portal, WinCC, Ladder, FBD, ProfiNet, ModBus TCP, 4-20mA sensors, HAZOP, SIS.
